The screenshot shows the AmpliFi Wi-Fi Setup Wizard web portal. At the top left is the 'AMPLIFI' logo, and at the top right is a blue 'Contact support' button. The main heading is 'AmpliFi™ Wi-Fi Setup Wizard'. Below this is a white card containing the AmpliFi logo and the model number 'AFI-R-HD-020855'. The card has two input fields: 'Name Your Wireless Network' and 'Create Your Wireless Password', each with a Wi-Fi icon and a text input line. Below the password field is a checkbox labeled 'Use the same password for administration', which is checked. At the bottom right of the card is a green 'Save & Continue' button.

- Connect to the new wireless network that you've created from your computer or tablet.

Installing the MeshPoints

For best performance, the MeshPoints should be placed in different directions between the Router and the areas farthest from the Router. Mesh multi-hop should only be used when necessary as performance will degrade with each hop.

Best Performance

Mesh Multi-Hop

MeshPoint installation is optional and may not be necessary in smaller homes.

- 1** Plug the MeshPoint into a power outlet.

- 2** After about a minute, LEDs will reflect signal strength once the MeshPoint is connected to the Router.

- 3** The MeshPoint antenna can be adjusted to provide optimal signal coverage for your location.

Tip: If a MeshPoint is powered on and has been configured with the app but does not appear online, try relocating the MeshPoint closer to the Router.

App Features

Remote access can be enabled using your Facebook or Google account. To enable remote access, go to the side menu as shown on page 20.

Overview

The system dashboard is displayed in the *Overview* window. It provides an overview of the AmpliFi Wi-Fi system including network status, number of connected clients, and active download/upload speeds. Tap devices to display/edit settings.

Performance

Tap **Start Test** on the *Performance* screen to run a speed test that will provide your download speed, upload speed, and connection ping time. Swipe left on the throughput section to view additional data. A history of recent tests is displayed at the bottom.

To provide guest access, determine the number of guests, select a time limit for their access, and tap **Start**. Guests simply connect to your wireless network named with the *-guest* label. No password is required. As guests connect, the number of users connected will be displayed in the app. Tap *Stop* at any time to turn off the guest network.

The Family Profiles feature allows you to create profiles for family members, groups, or areas of your home. Assign devices to the profile, schedule quiet time (when internet is not accessible), and pause the internet at any time.

The *Diagnose* option will check your WAN link, IP settings, internet connection, and MeshPoint status.

Side Menu - 24/7 Live Chat Support

Tap the ☰ icon in the upper left of the app to access the side menu. Tap **Live Support** for 24/7 live chat support. Remote Access can also be enabled from this menu.
